DESCRIPTION:

Premium wood cutting TCT blades for use on mitre saws and chop saws. Manufactured using high grade carbide teeth for long life and precision hardened steel plates for maximum stability.

FEATURES:

ATB -5°

MACHINE SUITABILITY:

Mitre and chop saws.

USER TIPS:

- Ensure that the cutting depth of the machine is set correctly for the material being cut
- Do not force the cut. Let the blade and machine do the work
- Always ensure that the blade is suitable for your machine type. Using a blade designed for another machine type could be unsafe
- Make certain that the blade is suitable for the material being cut
- The higher the tooth count, the cleaner the cut and the lower the tooth count, the faster the cut.
